A L L D R E A M S S T A R T O N T H E R O A D

We believe that wood is not only a production material, but also a living entity that tells stories. Each imperfection whispers a tale of the tree's journey with its own character. That's why we minutely source our wood from sustainable forests, ensuring the feasibility of responsible applications that protect our environment and promote the longevity of these precious resources. Welcome to our world of exquisite furniture, where detailed craftsmanship meets sustainability!

SOMETIMES YOU HAVE TO START **WITHOUT REGARDING THE CONDITIONS.**

If you were born in a city that lives with furniture, it means that furniture has somehow touched a part of your life. In addition, if you come from a productive tradition that was kneaded with this culture from generations ago, your road will definitely pass through this sector. Therefore, it would not be wrong to see being appointed as the hero of the story as a predestination of the Supreme God.

However, the thing that will set you apart among thousands of heroes and stories is to dare a grueling brand journey that will create added value for all your stakeholders.

That is your intention. On this road we set out with a genuine intention and sincerity, our only goal is to continue our journey success-

—————

■ Sedat PORTAKAL
Founder

REAL SUCCESS IS POSSIBLE WITH THE RIGHT TEAM

"This is İnegöl, a global furniture production center where thousands of producers supply furniture all over the world. The strong producer identity of İnegöl furniture is indisputable both in terms of design and product quality. However, it is not possible to say the same words about branding and sustainability. Therefore, I owe Yol Living's existence story to my employers, whose road I could not improve with my personal vision even though I worked for it."

Yol Living, which we brought to life in 2014 by centering total quality on the focus of R&D, innovation, design, production and service, is rapidly moving towards the point we dreamed of with a white-collar employment rate of 35%, an export volume over 70% and a 0.2% after-sales service rate today. And of course, we are still at the very beginning of the road.

First of all, I believe that real success will come with the right team no matter what you do. With this awareness and approach, I formed my management team with the participation of both important names in the sector and my family members who are experts in their fields. With the experience from this cooperation, we have included high-energy and dynamic professionals in all our departments and we still continue to do so. Thus, we train our own qualified personnel.

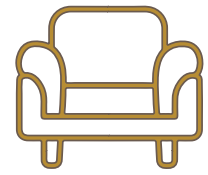

We owe this great acceleration of Yol Living in a short time to the invaluable contributions made by our stakeholders, the right steps taken in the teaming process, and our valuable colleagues who

embrace their work. By taking advantage of this opportunity, I would like to express my gratitude to everyone who has worked with us and contributed to Yol Living.

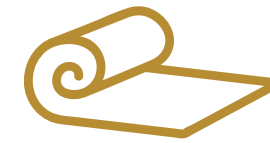

In my management philosophy, the right system comes after the right team. If you cannot build your branding vision on a functional and sustainable system, the commercial successes achieved will soon become nothing more than memories. At this very point, we strive to invest in our work and our employees rather than individual wealth. We are very happy to share the added value created by our business and to commune with all our stakeholders. We want to leave a legacy built on solid roots, both for our own children and for the children of our employees. We are striving with all our might to transform Yol Living, which is today known as one of the leading furniture producers in Turkey, into a Turkish brand that has a voice in the world.

If you are dreaming of crossing the ocean, the ship you embark on must be capable of the voyage and withstand the difficult conditions. Our strongest principle that will carry us to the other side of the water on

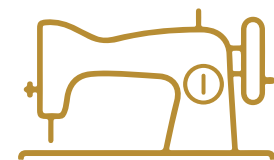

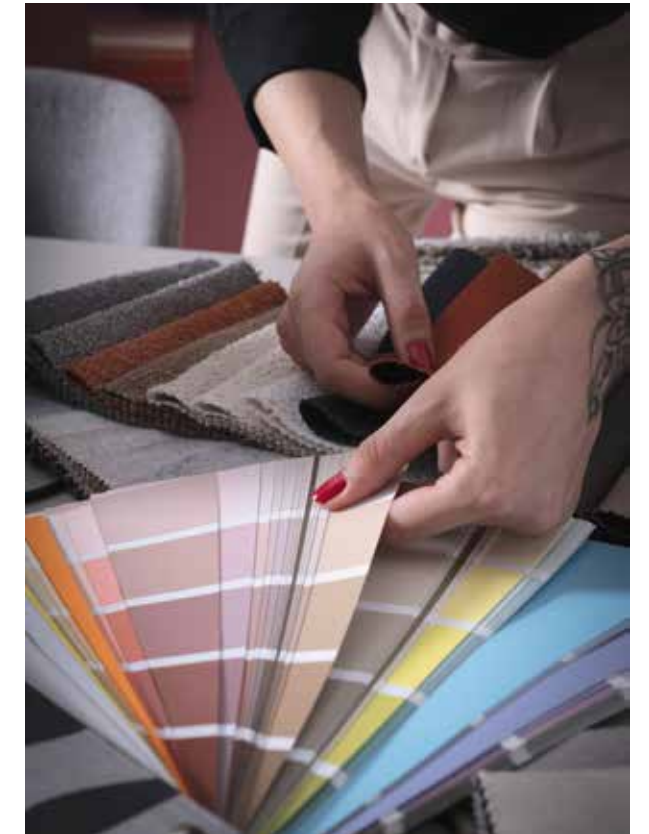

We create our high quality and durable sofas by ensuring the perfect harmony of handcraft and modern production

Carried out by an experienced and passionate team, our production process is shaped by skillful processing of carefully

Using the latest modern technologies, we pay special attention to every detail of our designs.

Quality control steps are strictly followed in our production process as we maintain superior quality standards at every stage.

■ **LEGATO**

Sofa

Our Legato armchair is offered in a refined combination of linen and leather. The seat, armrests, and backrest feature pleated detailing, enhancing both aesthetics and comfort. The linen fabric is woven to meet the high standards of Turkish textile craftsmanship, while the leather is reinforced with genuine leather fibers, making it highly resistant to scratches and abrasion.

**LEGATO
Sofa**

The Legato is a modular product designed for flexible configurations. Desired modules can be produced in any arrangement to suit individual preferences and space requirements.

LEGATO Sofa

“The seat structure utilizes CNC-cut foam with specifications of 12 cm thickness and 32 density forta as the primary support material. On top of this layer, a 3 cm, 25 density feather-touch foam is applied, followed by 90g fiberfill to enhance tactile comfort, visual richness, and superior seating experience. Density refers to the weight of the foam per cubic meter, expressed in kilograms. In this case, the primary carrier foam weighs 32 kg per cubic meter. The forta feature highlights the foam’s resilience and ability to return to its original shape after use.

The combination of ideal foam thickness, optimal density, resilience, and elastic webbing creates a perfect balance between strength and comfort — both achieved simultaneously in the final product.”

LEGATO / Sofa

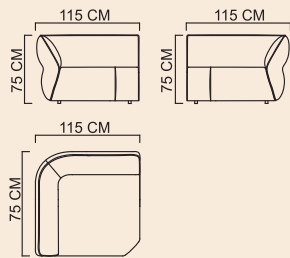

LEGATO
Sofa

“The seat area is reinforced with green elastic webbing, designed to evenly distribute pressure across the entire seating surface. This technique significantly enhances resistance against foam deformation, ensuring long-lasting comfort throughout the product’s lifespan.”

LEGATO Middle Coffe Table

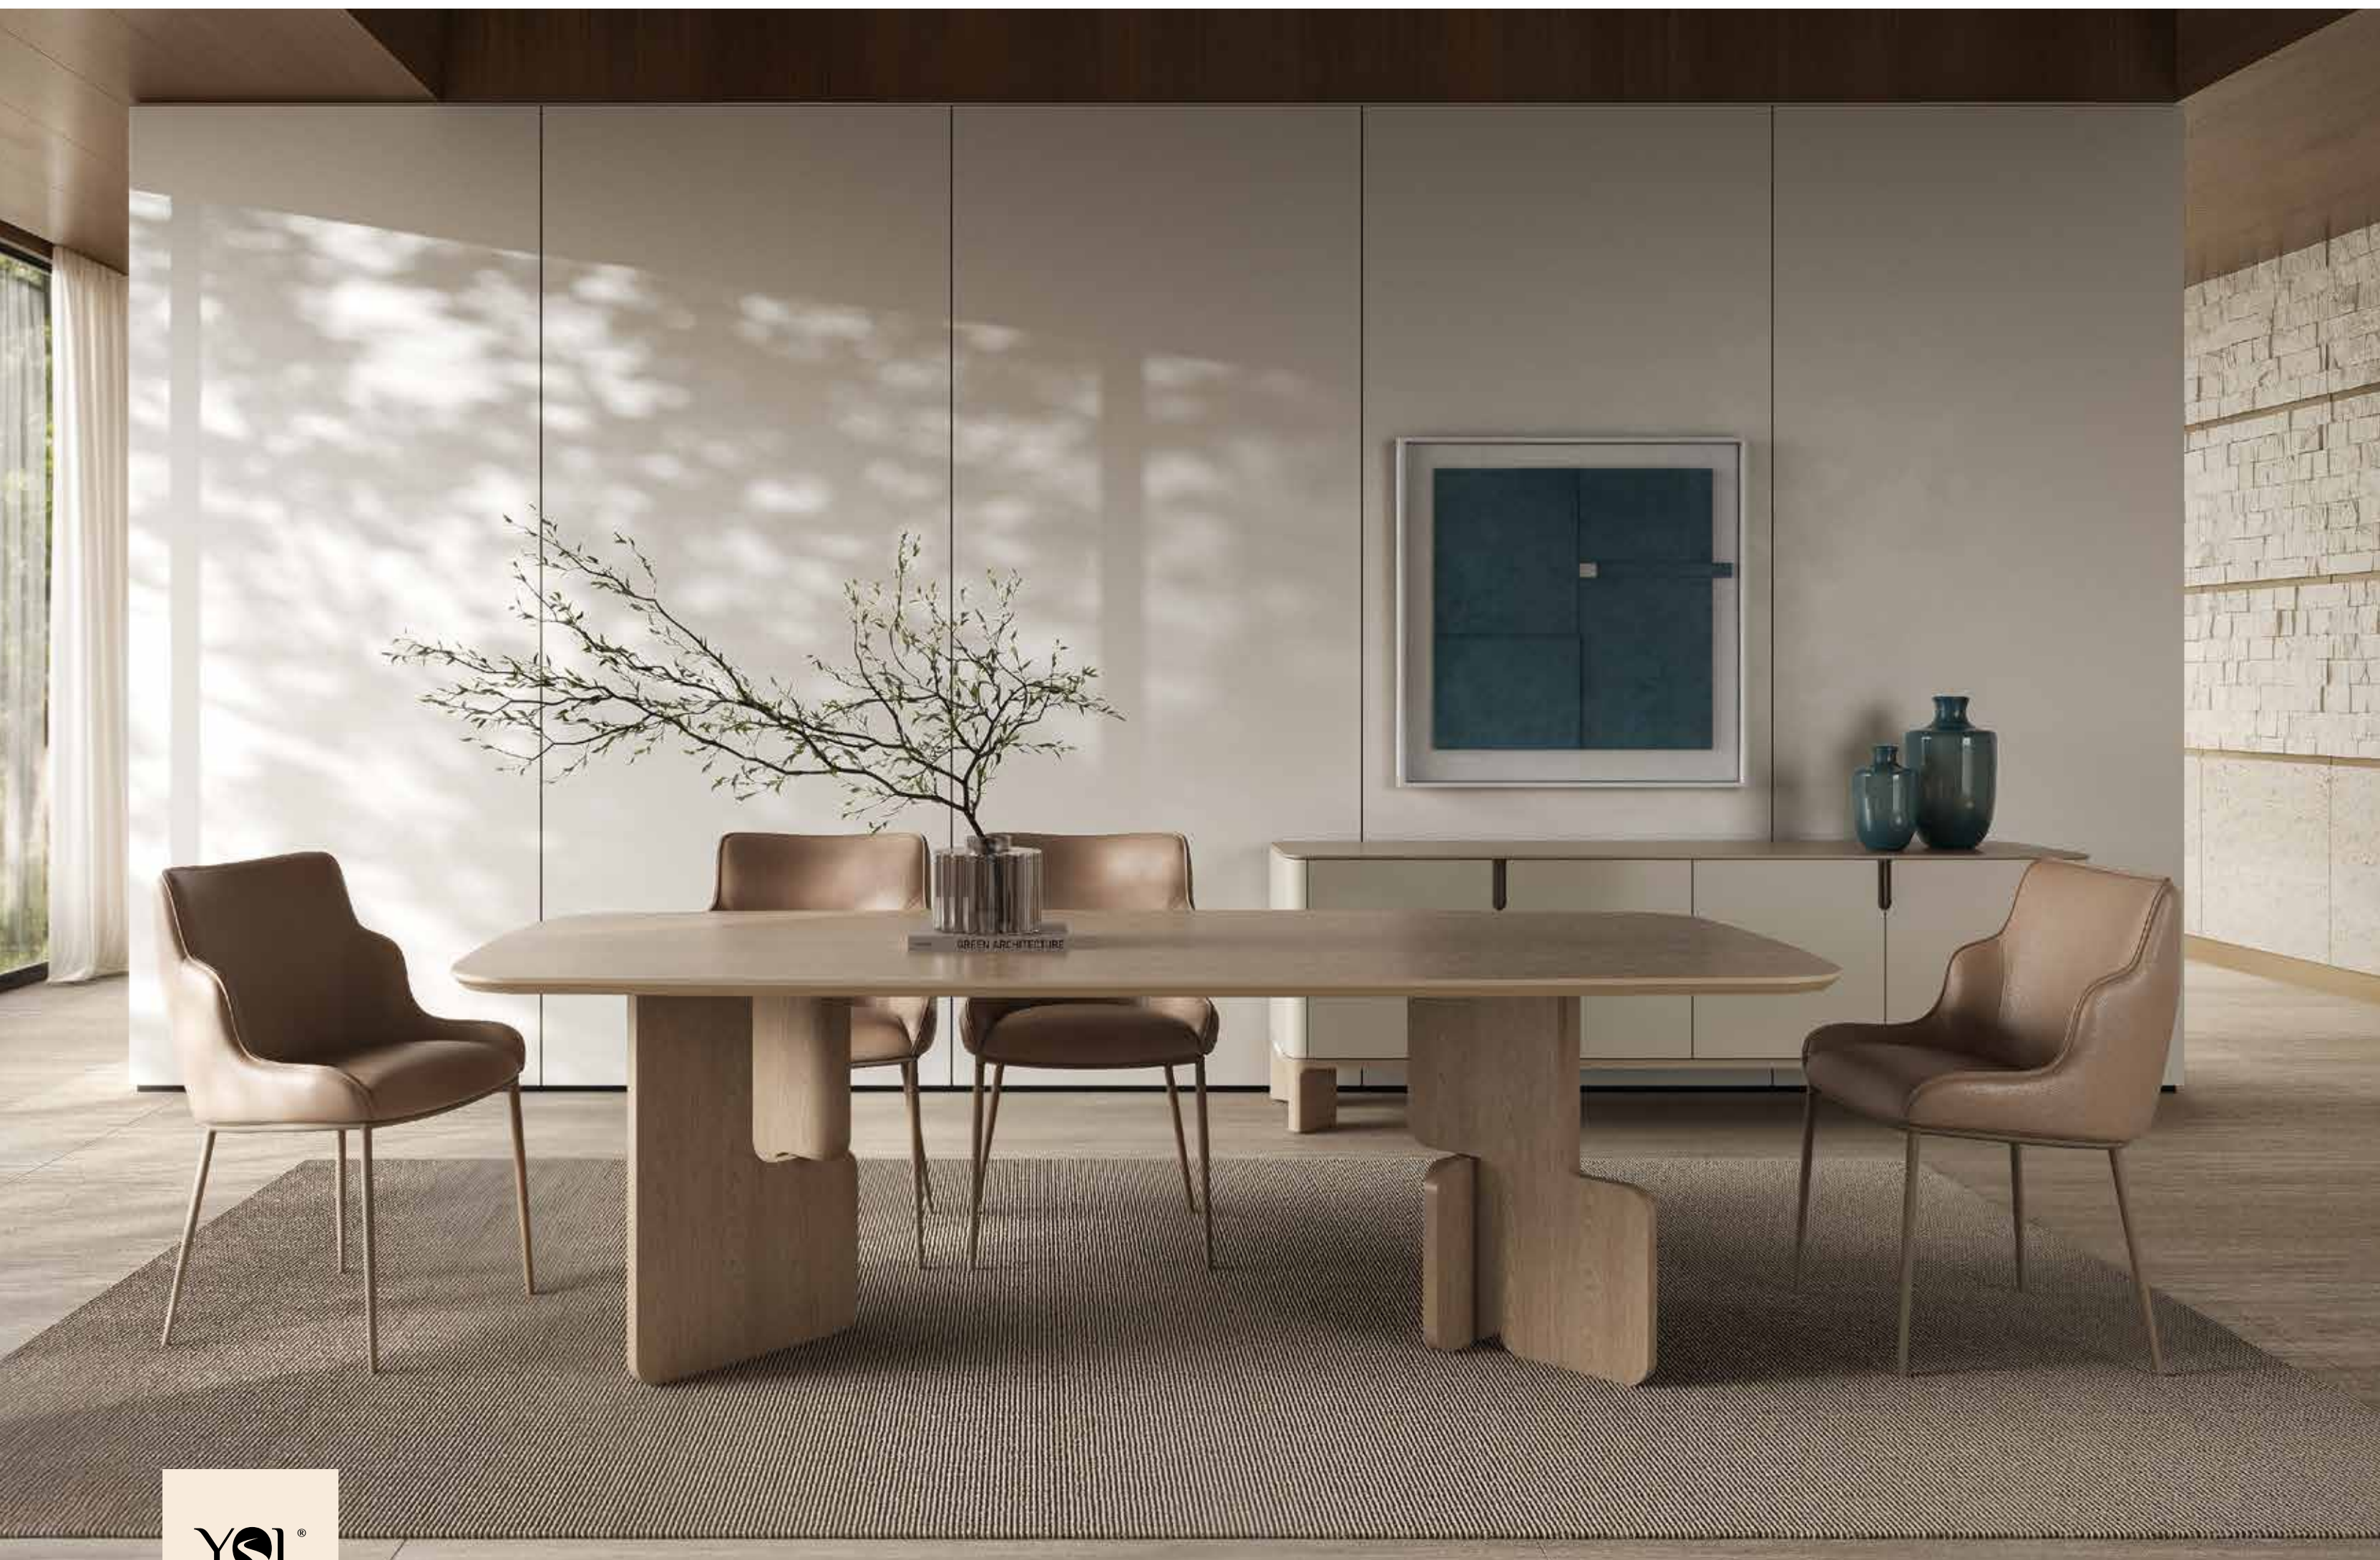

ENYA

Dining Room

The Enya collection is designed as a sophisticated series that blends the warmth of natural wood textures with contemporary lines. The dining table, sideboard, and coffee tables bring a calm harmony to the space with their elegant wood veneer surfaces, while the TV unit adds a striking focal point through its Italian Patagonia ceramic detailing. With its modular structure, Enya adapts easily to different living spaces, offering a balanced fusion of natural materials and modern design.

ENYA DINING ROOM

The Enya dining table and sideboard are crafted using premium wood veneer surfaces selected for their natural grain and texture consistency. The dining table top is reinforced with an engineered substrate to maintain stability and prevent warping over time. The sideboard features spacious internal storage with soft-close hinge systems, ensuring quiet and controlled movement. Both pieces are manufactured using modern CNC technology, providing dimensional accuracy, reinforced joinery, and a durable construction suitable for long-term daily use.

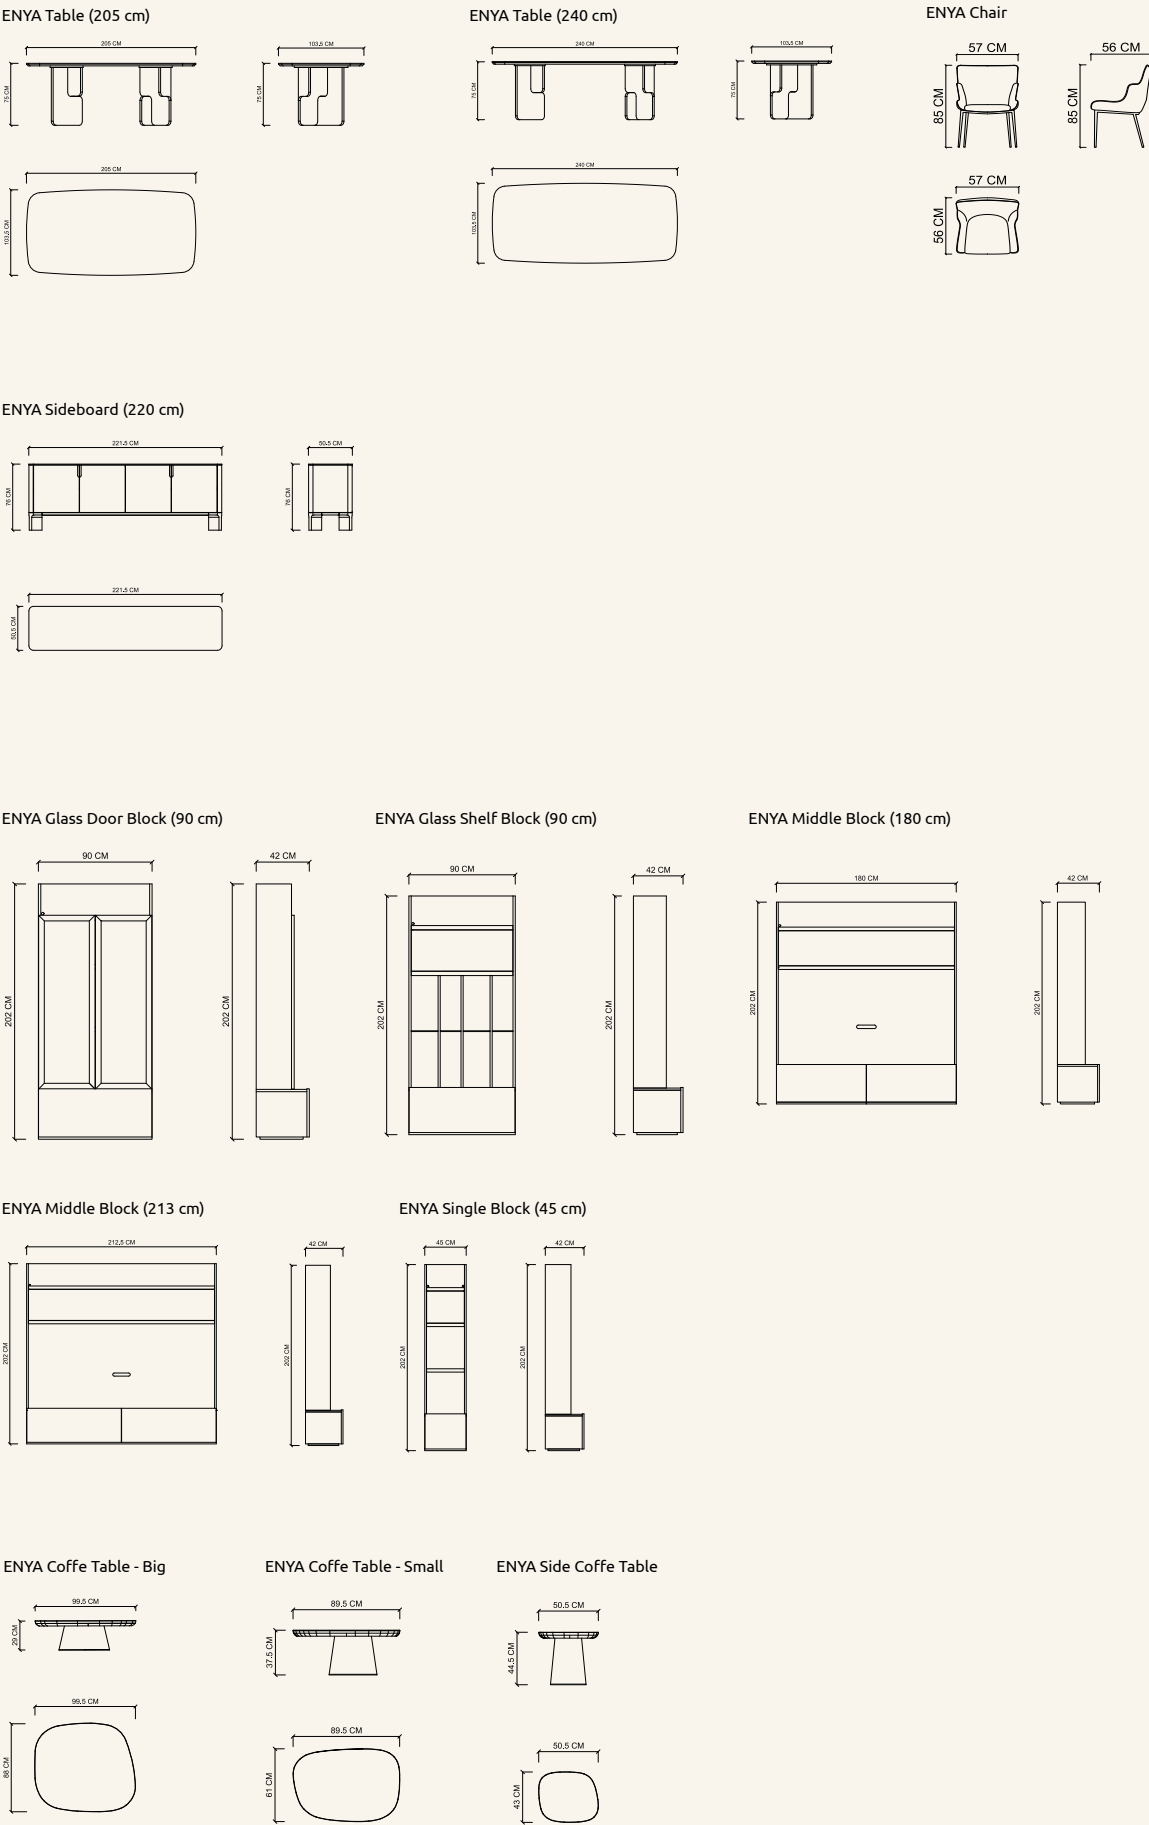

**ENYA
WALL UNIT**

The Enya Wall unit is designed with a modular structure, allowing flexible installation across different wall sizes and layouts. Its main surfaces feature high-quality wood veneer, while the central panel is enhanced with Italian Patagonia ceramic, known for its natural veining and scratch-resistant composition. The unit includes open shelves and closed storage sections engineered with concealed soft-close hardware to ensure silent and smooth operation. All components are produced using CNC-based cutting and drilling systems for consistent precision, structural stability, and long-term durability.

ENYA Dining Room

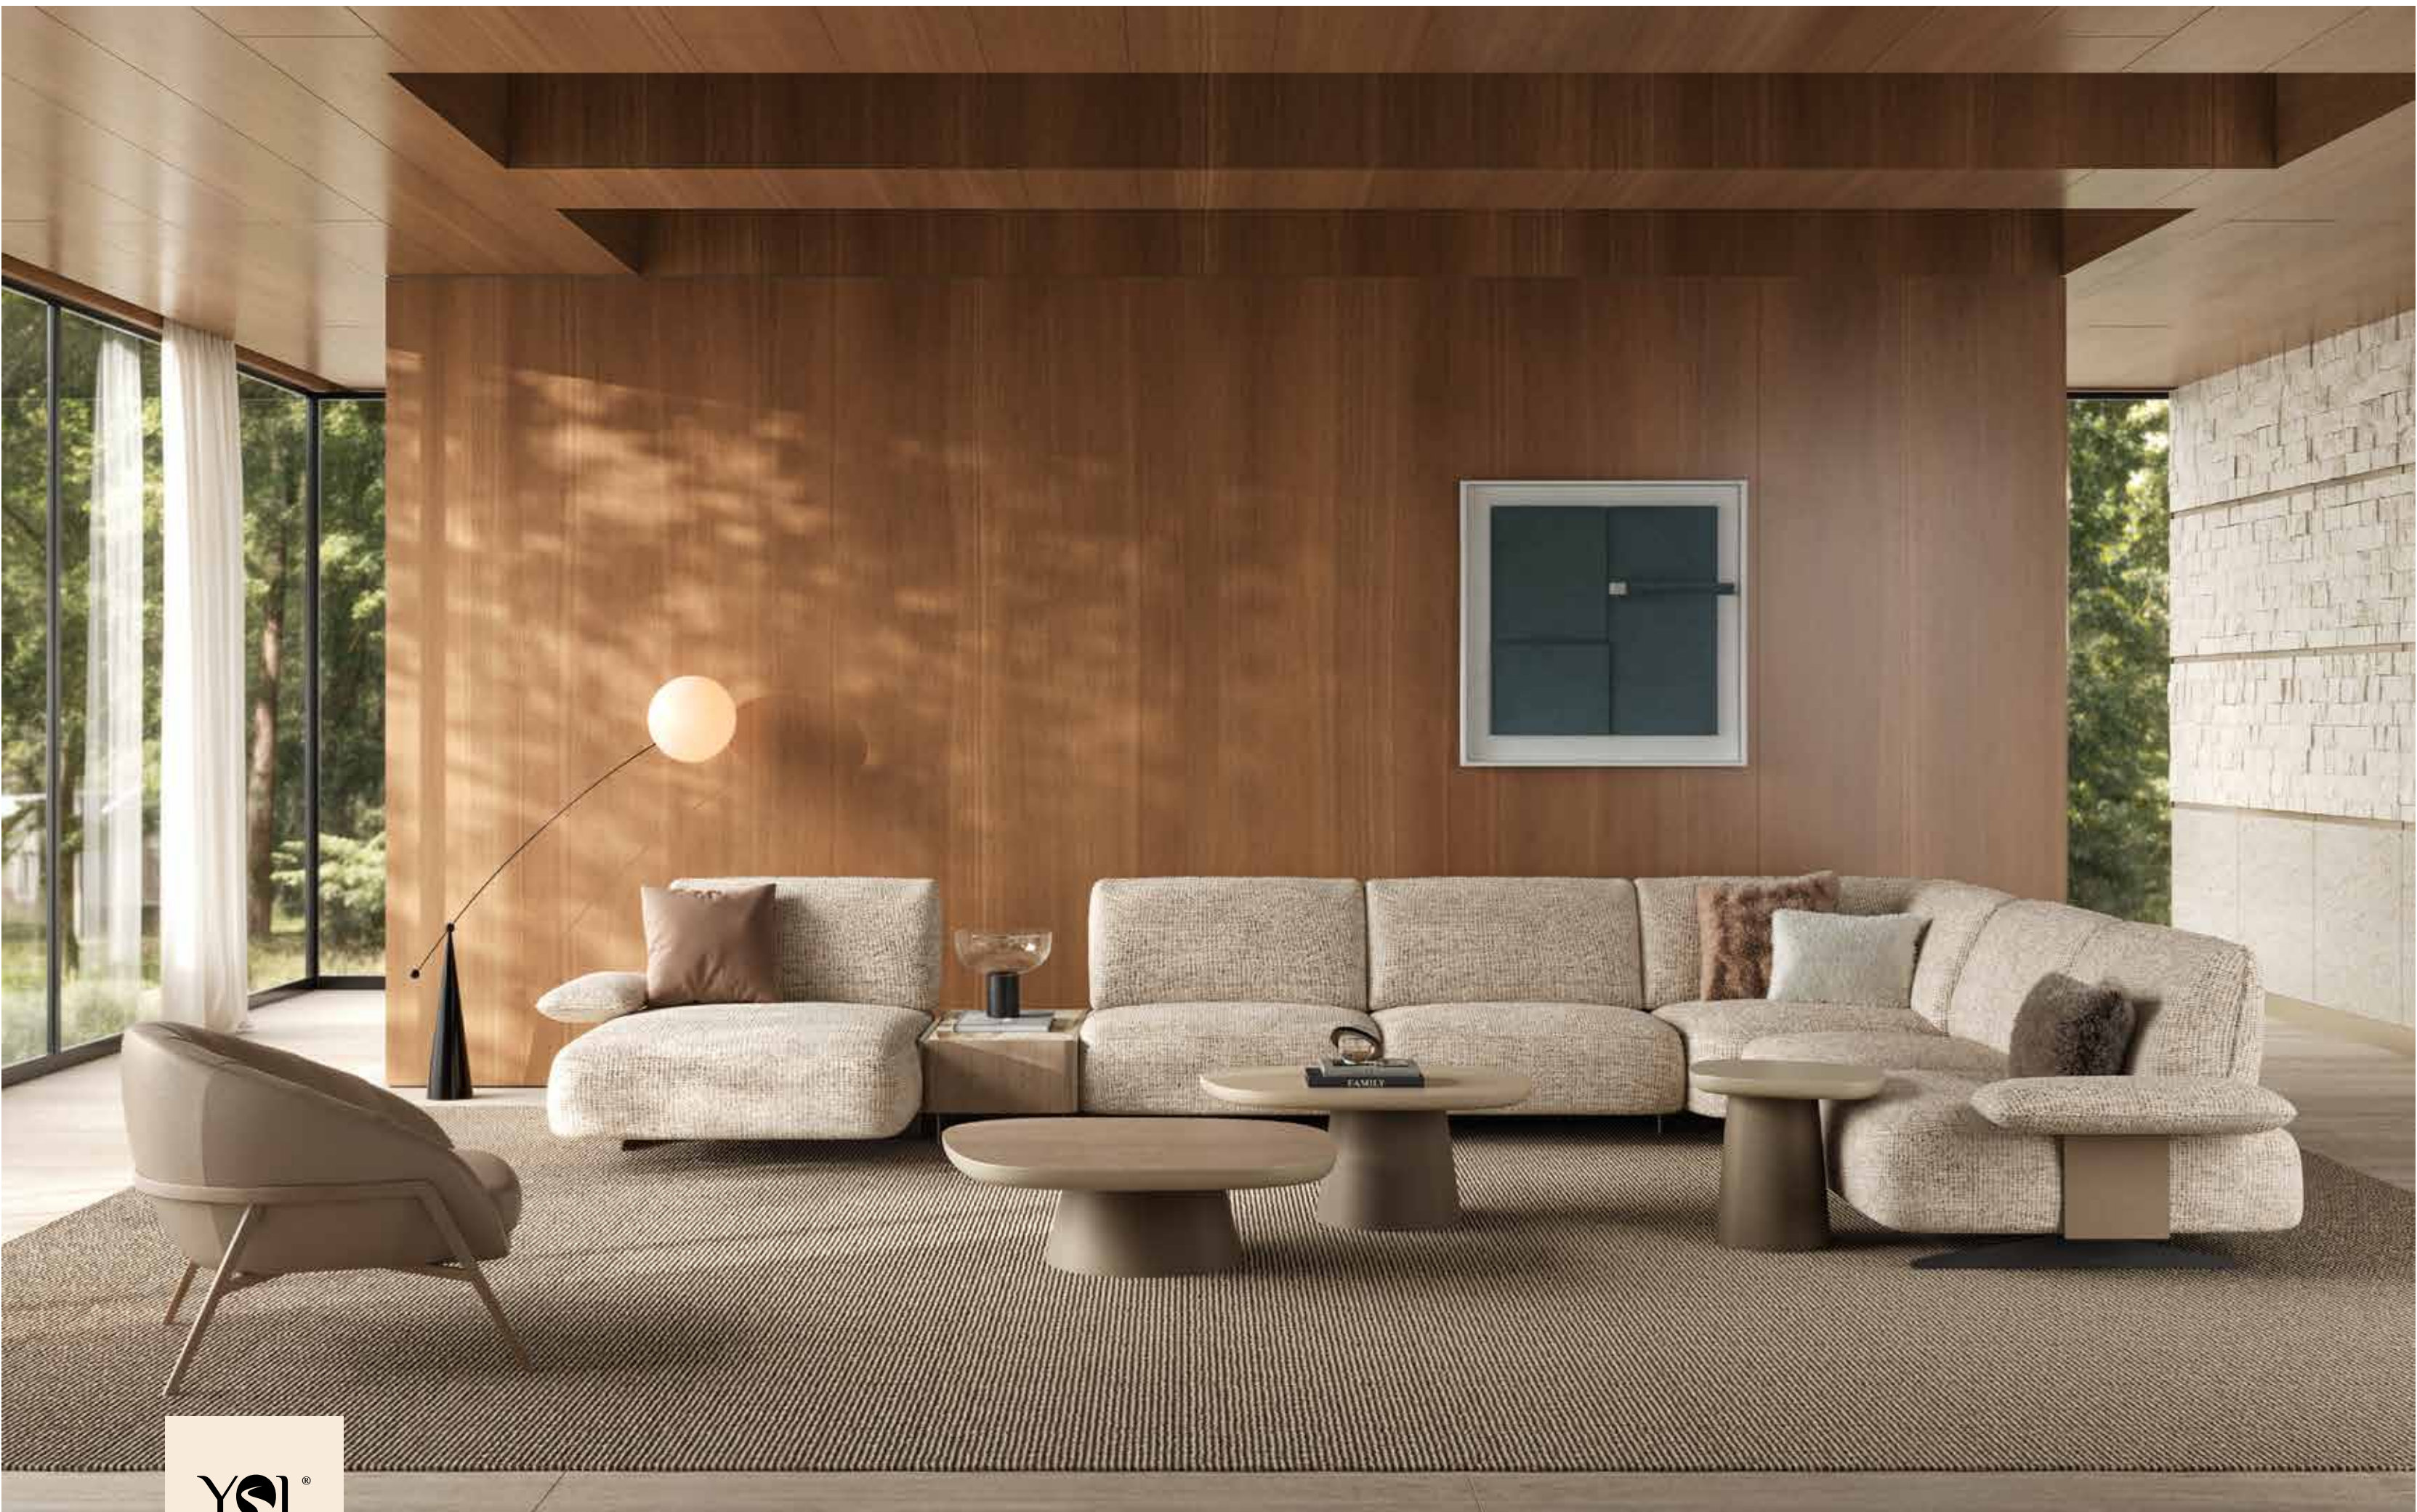

ALPINA

Sofa

Our Alpina sofa is built on a CNC-crafted plywood frame, offering a durable yet lightweight foundation. The seating section combines High Resilience foam with a feather-touch comfort layer, creating a smooth, balanced, and long-lasting sitting experience. The back cushions are enriched with feather-touch foam and laminated fiberfill, giving the Alpina its signature soft, inviting volume.

Supported by an integrated painted wooden base, the Alpina sofa blends structural stability with a refined, elegant appearance. Each piece is produced with careful craftsmanship and passes through detailed quality control to ensure consistent comfort and durability.

ALPINA Sofa

The Alpina model features a CNC-cut frame made from 14 mm first-grade plywood, offering a strong yet lightweight structure. The seat uses the NAT-307 elastic webbing system, providing long-lasting flexibility and support. Above the webbing, a CNC-cut 15 cm, 35 density High Resilience foam forms the main carrier layer, topped with a 3 cm, 25 density feather-touch foam for added softness. The entire seat is wrapped with 300 g laminated fiberfill to enrich comfort and surface quality.

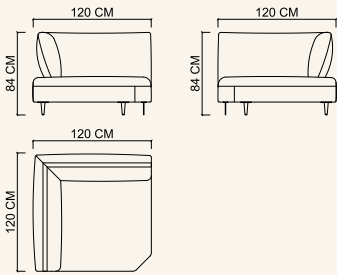

The backrest is built with 8 cm, 25 density feather-touch foam and finished with 300 g laminated fiberfill for a fuller, softer feel. The armchair leg is crafted as an integrated, painted wooden structure. Every Alpina piece undergoes quality control and is carefully packaged to ensure durability and safe delivery.

MILA

Sofa

The Mila sofa is displayed with a combination of linen and leatherette fabrics. The pleat technique has been applied to the seat, arms, and back parts of a sofa. 11-cm fronts emphasize the contemporary structure of the product. The linen fabric is Turkish-woven quality linen fabric. The leatherette, reinforced with recycled genuine leather powder, is extremely resistant to scratching and friction.

■ MILA / Sofa

With a minimalistic modern style, practical modular system, and extra wide DSS mechanism this product is a perfect match for any home laid out in contemporary interior design.

■ AMARA Armchair ■

Amara's main fabric is chosen from the Venus collection. Venus 600 Martindale value is 60000. Martindale tests are used to test the abrasion and pilling resistance of fabrics. The resulting value represents the friction resistance. A value above 15000 is considered highly durable. The weight of Venus 600 fabric is 550 gr/m2. The legs of the product are made of matte black, oven-painted stainless steel. To prevent the floor surface from scratching, a rubber pat is used on the bottom of the leg. The armchair leg rotates 360°.

■ AMARA Armchair
